At-home test

Allergy Test

Lab test

Blood

Name: **Dummy Persson** Date of test: **03/02/2023** Analysis-ID: **ALLERGI-DUMMY**

About the test

Food allergies and intolerances are major public health problems and having a diagnosis is crucial to identify these allergens for clinical and lifestyle changes.

The degree of allergy means that you have a different level of sensitivity to responses to the allergen even if the allergen is itself in low doses. The higher the concentration of IgG antibodies, the greater the chance that the tested item will trigger allergic symptoms. The severity of the symptoms can vary from person to person even if the levels of IgG antibodies are the same.

The appearance of the symptoms is a strong indicator that you have an allergic reaction to an allergen. Please keep in mind that to give accurate results, you should be in good health and not taking any medication that could affect the test results.

How to interpret your result

Your test results are displayed on a scale from 0 to 6 for each item, depending on the amount of IgG antibodies.

CLASS 0: No reaction

CLASS 1-2: Weak sensitization

CLASS 3-4: Moderate sensitization

CLASS 5-6: Strong sensitization

Overview of your results

47.37% of items tested showed no reaction.

36.84% of items tested showed weak reaction.

13.16% of items tested showed mild reaction.

2.63% of items tested showed strong reaction.

Your test results - Different types of pollen

Name	Value	Class	Scale
Ash (pollen)	2.38 U/ml	2	
Bahia grass (pollen)	<0.35 U/ml	0	
Bermuda grass (pollen)	<0.35 U/ml	0	
Birch (pollen)	0.55 U/ml	1	
Cypress (pollen)	<0.35 U/ml	0	
Hazelnut (pollen)	4.04 U/ml	3	
Mugwort (pollen)	1.32 U/ml	2	
Olive (pollen)	2.16 U/ml	2	
Ribwort plantain (pollen)	<0.35 U/ml	0	
Rye (pollen)	<0.35 U/ml	0	
Timothy grass (pollen)	<0.35 U/ml	0	
Wormwood ambrosia (pollen)	2.01 U/ml	2	

Your test results - Food

Name	Value	Class	Scale
Almonds	0.58 U/ml	1	
Apple	2.61 U/ml	2	
Carrot	<0.35 U/ml	0	
Cod	<0.35 U/ml	0	
Cow's milk	9.75 U/ml	3	
Crayfish	10.84 U/ml	3	
Egg white	<0.35 U/ml	0	
Hazelnut	9.48 U/ml	3	
Meat (pork, beef, chicken, lamb)	<0.35 U/ml	0	
Orange	1.55 U/ml	2	
Peach	<0.35 U/ml	0	
Peanuts	3.49 U/ml	2	
Potato	<0.35 U/ml	0	
Rice	0.50 U/ml	1	
Salmon	<0.35 U/ml	0	
Shrimp	99.52 U/ml	5	
Soy	8.94 U/ml	3	
Strawberry	<0.35 U/ml	0	
Tomato	<0.35 U/ml	0	
Wheat	2.31 U/ml	2	

Your test results - Non Food

Name	Value	Class	Scale
Cat	 <0.35 U/ml	0	
Cockroach	 0.47 U/ml	1	
Dog	 <0.35 U/ml	0	
Horse	 1.70 U/ml	2	
Mildew (Cladosporium herbarum)	 2.31 U/ml	2	
Mite	 <0.35 U/ml	0	

Interpret the results

Normal values - but showing symptoms?

It is possible to have a positive result on an allergy test even though you do not have any symptoms. This is because the test is a blood test and it is possible to have a positive result even if you do not have any symptoms. This is because the test is a blood test and it is possible to have a positive result even if you do not have any symptoms. This is because the test is a blood test and it is possible to have a positive result even if you do not have any symptoms.

Cross reactions - positive result despite no symptoms?

It is possible to have a positive result on an allergy test even though you do not have any symptoms. This is because the test is a blood test and it is possible to have a positive result even if you do not have any symptoms.
